FOREWORD

This 9th edition of Debt Statistical Bulletin serves as a vehicle for providing users with data on external and domestic debt as at end June 2017. Production of Debt Statistical Bulletins is undertaken on quarterly basis for the ultimate purpose of making public and publicly guaranteed debt data available to policy makers, and other users. It is a useful instrument for dissemination of public debt statistics to investors in Government debt instruments, Development Partners (DPs) and the general public.

Production of this bulletin is consistent with the reporting framework stipulated in the 2013 Public Debt Management Framework published by the Ministry of Finance, Planning and Economic Development. In addition, production of Debt Statistical Bulletins is in line with World Bank's Debt Management Performance Assessment (DeMPA) 2015 Framework (first dimension of the fourth Debt Performance Indicator).

Enjoy your reading.

For God and My Country.

Kieth Muhakanizi

PERMANENT SECRETARY/SECRETARY TO THE TREASURY

PREFACE

This Public Debt Statistical Bulletin has been prepared under the joint responsibility of the team led by Debt Policy and Issuance Department. The preparation of this bulletin was also done in collaboration with the Treasury Services and Asset Management Department, the Macroeconomic Policy Department of MoFPED, and Statistics Department of the Bank of Uganda.

Following the need for comprehensive, internationally comparable, and reliable information on external debt to inform policy makers, financial markets, and other users; publication of the Public Debt Statistical Bulletin is very vital. In addition, the Uganda Public Debt Management Framework, 2013 gives the Ministry of Finance Planning and Economic Development the mandate to prepare and publish quarterly Debt Statistical Bulletins.

This bulletin covers public and publicly guaranteed debt prepared with the following objectives,

- a) To produce accurate, comprehensive, consistent, reliable, timely and internationally comparable debt statistics.
- b) To provide the debt status of the country, enhance policy making, transparency, accountability, and effective debt management for sustainable economic growth and development.
- c) To disseminate official debt statistics i.e. parameters of external and domestic debt to policy makers, the general public, government officials, international organisations, investors in debt securities and other stakeholders for research and informed decision making.

Against the above objectives, the bulletin presents useful data on the performance of the Debt Strategy on a quarterly basis

For further information or comments regarding the bulletin, contact the Debt Policy and Issuance Department at the Ministry of Finance Planning and Economic Development at DPI@finance.go.ug.

NOK	Norwegian Krone
SAR	Saudi Arabia Riyal
SDR	Special Drawing Rights
SEK	Swedish Krone
UGX	Uganda Shillings

PART I: GENERAL INFORMATION

Debt Management and Performance Assessment (DEMPA) Framework 2015 recommends proper debt recording and reporting as one of the key components of effective debt management. The debt statistical bulletin seeks to address this component to facilitate transparency and accountability

Scope:

This bulletin covers,

- i) Central Government external debt
- ii) Domestic debt

The central Government external debt refers to all external loans contracted between external creditors and MoFPED

Domestic debt covers Government issuances of Treasury Bonds & Treasury Bills from the domestic market.

Data Source & Conversion of Debt Data to the Functional Currency:

Both MoFPED and BOU use the Debt Management and Financial Analysis System (DMFAS) to record detailed loan information and produce aggregated data and reports for public sector debt.

Data has to be reconciled & converted into a common currency, usually the US dollar or UGX as follows:

- i) To convert stock figures into US dollars or UGX, the end period exchange rate is used.
- ii) To convert flow figures into US dollars or UGX, the day's exchange rate as day of transaction is used.

Exchange Rates:

The exchange rates used for compiling debt data are obtained from the BoU (Daily Transaction Exchange Rates).

PART II: MACRO ECONOMIC OVERVIEW

PART V: GLOSSARY OF DEBT AND RELATED TERMS

Agency	An agency in a <i>creditor economy</i> that provides insurance, guarantees, or loans for the export of goods and services
Amortization	The repayment of the principal amount of a loan spread out over a period of time.
Amortization Schedule	The schedule for the repayment of principal and payment of interest on an ongoing basis.
Arrears	Amounts that are both unpaid and past the due date for payment
Average time to Maturity	This is a measurement of the weighted time to maturity of all the principal payments in the portfolio. (See maturity)
Average time to Refixing	This is a measure of the average time until all the principal payments in the debt portfolio become subject to a new interest rate.
Bills	These are securities (usually short term) that give holders the unconditional rights to receive stated fixed sums on a specified date.
Bilateral Creditor	A type of creditor in the context of external debt. Official Bilateral creditors include governments and their agencies, autonomous public bodies or official export credit agencies.
Borrower (debtor)	The organization or the entity defined as such in the loan contract which usually is responsible for servicing the debt.
Bullet Repayment	The repayment of principal in a single payment at the maturity of the debt.
Commercial Interest Reference Rates (CIRR)	A set of currency-specific interest rates for major OECD countries.
Commitment:	An obligation to furnish resource of a given amount under specified financial terms and conditions.
Commitment Charge (fee)	Charge or fee made for holding available the undisbursed balance of a loan commitment
Concessional Loans	These are loans extended on terms substantially more generous than market loans. Concessionality is achieved either through interest rates below those available on the market or by longer <i>grace periods</i> , or a combination of these. Concessional loans typically have long grace periods.
Credit	An amount for which there is a specific obligation of repayment.
Creditor	The organization or entity that provides money or resources and to whom payment is owed under the terms of a loan agreement. It's an entity with a financial claim on another entity.
Creditor Country	The country in which the creditor resides.

Currency of denomination	The unit of account in which amounts of indebtedness are expressed in the general/loan agreement.
Currency of Reporting	The unit of account in which amounts are reported either to the compiling agency and/or to an international agency compiling debt statistics.
Currency of Settlement	The currency of settlement is determined by the currency in which the values of the flows and positions are settled. It is important for international liquidity and measurement of potential foreign exchange drains. The currency of settlement may be different from the currency of denomination. Using a currency of settlement that is different from the currency of denomination simply means that a currency conversion is involved each time a settlement occurs.
Debt	All Liabilities that are debt instruments
Debt Conversion	The exchange of debt for a non debt liability, such as equity, or for counterpart funds can be used to finance a particular project or policy.
Debt Default	Failure to meet a debt obligation payment, either <i>principal</i> or <i>interest</i> .
Debt Disbursed and outstanding	The amount that has been disbursed from a loan commitment but has not yet been repaid or forgiven.
Debt Instrument(s)	These are financial claims that require payments of interest and or/principal by the debtor to the creditor at a date or dates in the future.
Debt Prepayment	This consist of a repurchase, or early payment, of debt at conditions that are agreed between the debtor and the creditor
Debt Refinancing	Debt refinancing involves the replacement of an existing debt instrument or instruments including any arrears with a new debt instrument or instruments.
Debt Service	Refers to payments in respect of both <i>principal</i> and <i>interest</i> . Actual debt service is the set of payments actually made to satisfy a debt obligation, including principal, interest, and any late payment fees. Scheduled debt service is the set of payments, including principal and interest, which is required be made through the life of the debt.
Debt-Service (-to-Exports) Ratio	The ratio of debt service (<i>interest</i> and <i>principal</i> payments due) during a year, expressed as a percentage of exports (typically of goods and services) for that year. Forward-looking debt-service ratios require some forecast of export. This ratio is considered to be a key indicator of an economy's debt burden.

Debtor Economy	The economy in which the debtor resides.
Deep Discount Bond	These are long term securities that require periodic coupon payments during the life of the instrument but the amount is substantially below the market rate of interest at issuance.
Disbursed Loans	The amount that has been disbursed from a loan but has not yet been repaid or forgiven.
Domestic Currency	Domestic currency is that which is legal tender in the economy and issued by the monetary authority for that economy, i.e., either that of an individual economy or, in a currency union, to which the economy belongs. All other currencies are foreign currencies.
Domestic Debt	Debt liabilities owed by residents to residents of the same economy
Export Credit	A loan extended to finance a specific purchase of goods or services from within the <i>creditor economy</i> . Export credits extended by the supplier of goods— such as when the importer of goods and services is allowed to defer payment—are known as <i>supplier's credits</i> ; export credits extended by a financial institution, or an <i>export credit agency</i> in the exporting economy are known as <i>buyer's credits</i>
External Debt	At any given time, is the outstanding amount of those actual current, and not contingent, liabilities that require payment(s) of <i>interest</i> and/or <i>principal</i> by the <i>debtor</i> at some point(s) in the future and that are owed to non residents by residents of an economy.
Face Value	Face value is the undiscounted amount of principal to be paid to the holder at maturity (e.g., the redemption amount of a bond).
Foreign Currency	Foreign currency is a currency other than the domestic currency (See domestic currency)
Foreign Debt	Same as External Debt
Fixed Interest Rate	A rate of interest that is defined in absolute terms at the time of the loan agreement.
Grace Period	The grace period for <i>principal</i> is the period from the date of signature of the loan or the issue of the financial instrument to the first repayment of principal.
Grant Element	The measure of concessionality of a loan, calculated as the difference between the face value of the loan and the sum of the discounted future <i>debt service</i> payments to be made by the borrower expressed as percentage of the face value of the loan.

Gross Domestic Product (GDP)

Essentially, the sum of the gross value added of all resident producer units plus that part (possibly the total) of taxes on products, less subsidies products, that is not included in the valuation of output.

Institutional Unit

An institutional unit is defined in the *2008 SNA* as “an economic entity that is capable, in its own right, of owning assets, incurring liabilities and engaging in economic activities and in transactions with other entities”

Interest

This is a form of investment income that is receivable by the owner of financial assets for putting such assets and other resources at the disposal of another institutional unit.

International Bank for Reconstruction and Development (IBRD)

The International Bank for Reconstruction and Development (IBRD) was set up as an intergovernmental financial institution in 1946 as a result of the Bretton Woods Accord. It is the original agency of the *World Bank Group* and is commonly referred to as the World Bank (see also *World Bank Group*).

International Development Association (IDA)

IDA, established in 1960, is the concessional lending arm of the *World Bank Group*. IDA provides low- income developing countries (economies) with long- term loans on highly concessional terms: typically a ten-year grace period, a 40-year repayment period, and only a small servicing charge.

International Monetary Fund (IMF)

Following the Bretton Woods Accords and established in 1945, the IMF is a cooperative intergovernmental monetary and financial institution with 187 member countries. Its main purpose is to promote international monetary cooperation so to facilitate the growth of international trade and economic activity more generally. The IMF provides financial resources to enable its members to correct payments imbalances without resorting to trade and payments restrictions.

Issue Price

It is the price at which the investors buy the debt securities when first issued.

Line of Credit

An agreement that creates a facility under which one unit can borrow credit from another up to a specified ceiling usually over a specified period of time. Lines of credit provide a guarantee that funds will be available, but no financial asset/liability exists until funds are actually advanced.

Loan

A financial instrument that is created when a creditor lends funds directly to a debtor and receives a non negotiable document as evidence of the asset

London Interbank Offered Rate (LIBOR)

LIBOR is a reference rate for the international banking markets and is commonly the basis on which lending margins is fixed. Thus, an original loan agreement or a *rescheduling agreement* may set the *interest* rate to the borrower at six-month dollar LIBOR plus 1.5 percent, with semi annual adjustments for changes in the LIBOR rate.

Maturity (Defined and Undefined)

Defined maturity refers to a finite time (fixed) period at the end of which the financial instrument will cease to exist and the principal is repaid with interest. Undefined maturity refers to the absence of a contractual maturity. Undefined maturity deposits include demand deposits, checking interest accounts, savings accounts, and money market accounts. Other examples of undefined maturity debt instruments are perpetual bonds.

Multilateral Creditors

These creditors are multilateral financial institutions such as the IMF and the World Bank, as well as other multilateral development banks.

Net Present Value (NPV) of Debt

The nominal amount outstanding minus the sum of all future *debt-service* obligations (*interest* and *principal*) on existing debt discounted at an interest rate different from the contracted rate.

Nominal Value

The nominal value of a *debt instrument* is the amount that at any moment in time the *debtor* owes to the *creditor* at that moment; this value is typically established by reference to the terms of a contract the debtor and creditor. The nominal value of a debt instrument the value of the debt at creation, and any subsequent economic flows, such as transactions (e.g., repayment of *principal*), valuation changes

Official Creditor

Official creditors are international organizations, governments and government agencies including official monetary institutions.

Official Development Assistance (ODA):

Flows of official financing administered with the promotion of the economic development and welfare of developing countries as the main objective, and which are concessional in character with a grant element of at least 25 percent (using a fixed 10 percent rate of discount).

Official Development Assistance (ODA) Loans

Loans with a maturity of over one year meeting criteria set out in the definition of ODA, provided by governments or official agencies and for which repayment is required in convertible currencies or in kind.

Original Maturity

The period of time from when the financial asset/liability was created to its final maturity date.

Paris Club Paris Club

An informal group of creditor governments that has met regularly in Paris since 1956 to provide debt treatment to countries experiencing payment difficulties; the French treasury provides the secretariat. Creditors reschedule a debtor country's public debts as part of the international support provided to an economy that is experiencing debt-servicing difficulties and is pursuing an

Present Value (PV)

The present value (PV) is the discounted sum of all future *debt service* at a given rate of *interest*. If the rate of interest is the contractual rate of the debt, by construction, the *present value* equals the *nominal value*, whereas if the rate of interest is the market interest rate, then the present value equals the market value of the debt.

Present Value of Debt-to-Exports Ratio (PV/X)

Present value (PV) of debt as a percentage of exports (usually of goods and services) (X). In the context of the Paris Club and *HIPC Initiative*, sometimes present value is mis described as *net present value* (NPV).

Principal

the provision of economic value by the *creditor*, or the creation of debt creation of debt liabilities through other means, establishes a principal liability for the debtor, which, until extinguished, may change in value over time. For *debt instruments* alone, for the use of the principal, *interest* can, and usually does, accrue on the principal amount, increasing its value.

Principal Outstanding

The amount of principal disbursed and not repaid.

Principal Repayment

The payments which are made against the *drawn* and outstanding amount of the loan

Private Creditors

These are neither governments nor public sector agencies. Private financial institutions, and manufacturers, exporters and other suppliers of goods that have a financial claim.

Public Sector:

The public sector includes the general government, monetary authorities, and those entities in the banking and other sectors that are public corporations.

Public Sector Debt

Total public sector debt consists of all debt liabilities of resident public sector units to other residents and non residents.

Public Sector External Debt

Total public sector external debt consists of all debt liabilities of resident public sector units to non residents.

Public Debt

The debt obligation of the public sector.

Public External Debt

The external debt obligation of the public sector.

Publicly Guaranteed Debt

The external obligation of a private debtor that is guaranteed for repayment by a public entity.

Quarterly External Debt Statistics (QEDS)

The Quarterly External Debt Statistics (QEDS) database, jointly developed by the World Bank and the International Monetary Fund brings together detailed external debt data of Countries that Subscribe to the IMF's Special Data Dissemination Standard (SDDS) and of countries that participate in the IMF's General Data Dissemination System (GDDS).

Redemption Price

It is the amount to be paid by the issuer to the holder at maturity.

Remaining (Residual) Maturity

The period of time until debt payments fall due. In the *Guide*, it is recommended that short-term remaining maturity of outstanding *external debt* be measured by adding the value of outstanding short-term external debt (original maturity) to the value of outstanding long-term external debt (original maturity) due to be paid in one year or less. These data include all arrears.

Short-Term Debt

Debt that has maturity of one year or less. Maturity can be defined either on an original or remaining basis (see also *Original Maturity* and *Remaining Maturity*).

Spread (Margin):

A percentage to be added to some defined base interest rate, such as LIBOR, to determine the rate of interest to be used for a loan.

Sovereign Debt

Sovereign debt is often used by financial markets and fiscal analysts as debt that has been contracted by the national government. Unlike grouping of the public sector, which is based on institutional units, "sovereign" is defined on a functional basis. Normally "sovereign issuer" of debt is the government (usually national or federal) that de facto exercises primary authority over a recognized jurisdiction whose debt are being considered. Consequently, sovereign debt is debt that has been legally contracted by the national government.

Stock of Debt

The amount outstanding as of a moment of time.

Stock Figures

The value of financial assets and liabilities outstanding at a particular point in time.

Supplier's Credit

A financing arrangement under which an exporter extends credit to the buyer.

Treasury Bills

Negotiable securities issued by the government. In general these are short term obligations issued with maturity of one year or less. They are traded on a discount bases.

Treasury Bonds	Longer Term Securities compared to Treasury Bills. Usually more than a year
Undisbursed	Funds committed by the creditor but not yet drawn by the borrower.
Yield-to-Maturity	The yield-to-maturity rate is the rate at which the present value of future interest and principal payments, i.e., all future cash flows from the bond, equals the price of the bond.
